

3834-DRL-L
Pilot Drill for Multi Construction
Holesaws 6.35 mm

PRODUCT DETAILS

- To be used in combination with Carbide holesaws
- 3834-DRL-CT fits any arbor except for arbors with core ejector function
- Carbide tipped pilot drill makes a hole in the work piece before the teeth of the holesaw become engaged, guiding and keeping the holesaw in correct position during the sawing operation
- High grade carbide tip with special properties, hardness and geometry
- Specially designed to provide one tool to cover many different materials
