

3946-228-8-HST-1P
Sabre Saw Tungsten Carbide
Tipped Blades for Heavy Duty
Metal 8 TPI 228 mm

PRODUCT DETAILS

- Heavy Standard Shape (HST) The wide body makes it highly resistant to bending, allowing straighter cuts even with tough jobs
- Carbide teeth for long life and high performance, making it suitable for working under extreme conditions
- Carbide tipped blades withstand heat and can work for a long time under extreme conditions
- Suitable for applications with high-strength steel
- Suitable for pipes, tubes or profiles 4 to 12 mm thick
- Medium tooth pitch 3 mm (8 TPI)
- Best results with 18 V cordless or corded sabre saws
- Universal shank – fits any type of reciprocating saw
- Industrial pack, -10P = 10 blades per box
