Sabre Saw Tungsten Carbide Tipped Blades for Stainless Steel

PRODUCT DETAILS

- Heavy Standard Shape (HST) The wide body makes it highly resistant to bending, allowing straighter cuts even with tough jobs
- Carbide teeth for long life and high performance, making it suitable for working on stainless steel under extreme conditions
- Carbide tipped blades withstand heat and can work for a long time under extreme conditions
- Suitable for cutting stainless steel
- Suitable for pipes, tubes or profiles 3 to 10 mm thick
- Medium/Fine tooth pitch 2.4 mm (10 TPI)
- Best results with 18 V cordless or corded sabre saws
- Universal shank – fits any type of reciprocating saw
